Career Profile

BCA graduate with a strong passion for solving real-world problems through technology. Completed an internship in Python Full Stack Development, gaining hands-on experience in both front-end and back-end web development. Skilled in programming, database management, and modern web technologies. Eager to apply technical expertise to build efficient applications and grow as a versatile developer in the tech industry.

Technical Skills

- **Programming Language:** Python, Java, C++, C, PHP
- **Backend:** Django, Django REST Framework, FastAPI (learning / hands-on)
- **Frontend Development:** React.js, HTML, CSS, JavaScript
- **Database:** MySQL, PostgreSQL (learning / hands-on)
- **Version Control:** Git, GitHub
- **Architecture and deployment:** Microservices Architecture, Docker, CI/CD basics

Experience

Python Full Stack Developer

SMECLabs, Kaloor

- Developed full-stack web applications using Django and Django REST Framework (DRF)
- Built responsive and component-based UIs using React.js, HTML5, CSS3, and Bootstrap.
- Integrated frontend and backend using REST APIs, handling authentication, data validation, and error handling.
- Gained hands-on experience in debugging, API testing (Postman), and full-stack application architecture.
- Currently working on microservices-based projects using Docker, focusing on service separation, API communication, and containerization.

Projects

Cartzy – Full Stack E-Commerce Platform

- Developed a full-featured E-commerce platform using **Django** that enables users to browse products, place orders, and track delivery status with Git and GitHub for version control and team development.
- Implemented **WebSockets** to push live notifications for order tracking, inventory updates, and delivery alerts.
- Developed the project through Git-based collaboration as a 2-member team, managing backend logic in Django.
- **Tools used:** Python, Django, MySQL, HTML, CSS, JavaScript, Git, GitHub, Django Channels & WebSockets .

Resort Management System

- Developed a resort booking and management system using PHP that allows users to view resorts, check availability, and make online reservations.
- Implemented core booking features including room allocation, reservation history, pricing, and customer details management.
- Used WAMP Server for local development and testing, ensuring smooth backend–database integration
- Built with MySQL database for efficient storage and retrieval of bookings and customer records.
- Tools used: PHP, MySQL, HTML, CSS, JavaScript, WAMP Server, Git, GitHub.

Education

Bachelor of Computer Applications

Sept 2022 - March 2025

DePaul Institute of Science and Technology, Angamaly, Ernakulam, Kerala

CCPA : 7.58
